CBAM Declaration Example

Definitive regime Reporting period 2026 Generated by the CarbonOps engine

Declarant: Meridian Metals Import B.V. (example importer)
Reporting period: 2026
Regime: definitive
Rule book: 2026-Q3-1
Total embedded emissions: 572,160 kg CO2e

Description	Qty	Unit	Amount
STEEL CN 7208 Trkiye 142,000 kg 276,900 kg CO2e (embedded default)	1	$0.00	$0.00
ALUMINIUM CN 7601 India 64,000 kg 120,960 kg CO2e (embedded default)	1	$0.00	$0.00
CEMENT CN 2523 Egypt 210,000 kg 174,300 kg CO2e (embedded default)	1	$0.00	$0.00

This is a representative example, not a filed declaration. Every emissions figure above is computed by the CarbonOps engine using the European Commission default emission values per CN code (Implementing Regulation (EU) 2025/2621), because supplier-specific verified data was not provided. When you supply verified installation data, those figures replace the defaults. You submit the completed declaration through the EU CBAM Registry as the authorised declarant.
